Feedback from facilitators and peers

Assignments between live sessions to begin connecting theory to practice

Opportunities to practice discrete skills with live feedback

INTRODUCTION TO A3 PROBLEM SOLVING

A practical and interactive workshop that follows the book *Managing to Learn* by John Shook. It is designed to equip organizations on the lean journey and strengthen a culture of learning, problem-solving and scientific thinking.

By attending this workshop, you will be led by experienced coaches, allowing you the space & time you need to reflect and apply the learning along the way.

A3 coaching forms a key component of the learning. This approach helps you align around a problem at your company that is informed by real-time facts. Along the way you will receive feedback and support from peers and senior coaches.

WHO SHOULD ATTEND?

Suitable to industries including manufacturing, service, healthcare and public sector
All individuals or teams who wish to gain an introductory understanding of A3 Problem Solving
