INTRODUCTION TO LEAN

A practical introduction to lean. Following the philosophy of 'learning by doing' participants will learn the lean principles and be able to apply core tools. Suitable to manufacturing, service, healthcare and public sector. This workshop is also available for on-site delivery.

The workshop includes presentations from an experienced facilitator, small group discussions and a simulation game. It is an interactive, cumulative learning experience, using cycles of a well-tested game that prompts incremental change through reflection.

- Getting started
- Going to gemba
- Current situation, target condition
- Value Stream Mapping
- Waste identification
- 5S, Visual Management
- Standard Work
- Sustaining the good work
