# LEAN TRANSFORMATION & KATA

The Lean Transformation Framework (LTF) challenges us to think strategically about lean implementation whereas Kata, in the lean context, are routines for daily learning and improvement. Suitable to manufacturing, service, healthcare and public sector. This workshop is also available for on-site delivery.

The workshop includes presentations from the facilitator, group discussions, and a Kata simulation game. We cover essential components such as the management system, leader behaviours, capability building to assist you in achieving your organisation's Purpose.

- Understand the Lean Transformation Framework dimensions and the Kata
- Develop skills in daily coaching inherent in the Kata
- Understand how to deploy the Kata for strategy execution and improved customer value
