DURATION

5 DAYS

We were positively overwhelmed by the success rate within such a short timeframe. The discipline of the daily management system attributed to this success.

RAPID PROCESS IMPROVEMENT

A practical, interactive and on-the-ground workshop focused on raising the performance of an work area within the week. Once the value stream opportunities are understood, the team is able to accelerate change through a highly-focused event. This workshop is ideally followed by the Daily Management System workshop, to develop the systems needed for sustainment and continuous improvement. Suitable to manufacturing, service, healthcare and public sector.

The workshop includes presentations from an experienced facilitator and a practical, high-impact activity to address a particular problem.

- Alignment improvement focus to strategy and customer value
- Going to Gemba
- Current State Map and measurement
- Target condition consensus
- Waste, overburden and variation
- Root cause analysis and countermeasures
- Experimentation and adjustment of actual on-the-ground changes
- Standardisation and sustainment
