LOCAL & INTERNATIONAL STUDY VISITS

Benefit from the Lean Institute Africa's membership of the Lean Global Network which enables our access to international practitioners from around the globe. We learn, share and collaborate with our international network to benefit our local organisations.

Lean implementation can vary significantly from organisation to organisation and sector to sector. With our contacts across the international lean community (more than 30 institutes globally) we host visits to sites that have made significant headway in their lean journey, and who are willing to share their learning openly.

Periodically, we arrange site visits to local companies who also have stories to share, affording you the opportunity to hear from others who are succeeding and experiencing challenges in their own implementation.
