

I found doing the practical exercise very beneficial. Great to apply the theory in a real situation.

Learn the key principles of the value stream mapping approach

Target system-wide improvements and foster cross-functional learning and improvement

VALUE STREAM MAPPING

A practical introduction to Value Stream Mapping. Keeping with the philosophy of 'learning by doing' participants will learn to grasp the current situation and use robust tools and techniques, to chart the way forward to meet the strategic objectives and deliver value to the customer. Suitable to manufacturing, service, healthcare and public sector.

The workshop includes presentations from an experienced facilitator, small group discussions and a practical activity in the actual workplace. It is an interactive, cumulative learning experience.

- Alignment of value stream improvement to strategic imperatives and customer value
- Going to Gemba
- Systems thinking
- Current State Mapping
- Finding the opportunities for change
- Future State Mapping
- Execution logic
